No. 40 Marine.—The 24th April, 1928.—In exercise of the powers conferred by section 52 of the Inland Steam-Vessels Act, 1917 (I of 1917), the Governor in Council is pleased to make the following rules for the protection of inland steam and motor-vessels from danger by collision, in supersession of the rules published under this Department Notification No. 148 Mne., dated the 23rd August, 1900.

A. CASSELLS,

Secretary to the Government of Bengal.

RULES.

Preliminary.

These rules are applicable to, and shall be followed by persons in charge of, all inland steam-vessels, and all other vessels, hereinafter specified, on all inland waters in Bengal on which steam-vessels ply, provided that rules 8, 21, 22 and 23 shall not apply to steam-vessels plying on the river Hooghly, between a line drawn west of Saugor Island Lighthouse and the northern boundary of the Port of Calcutta.

For the purposes of these rules—

- (a) a vessel shall be deemed to be "underway" when she is not at anchor or made fast to the shore or aground, and
- (b) the word "visible" when applied to lights shall mean visible on a dark night with clear atmosphere.
- (c) The word "steam vessel" shall include any vessel propelled by machinery.

Rules Concerning Lights, etc.

Article 1.—The rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

Article 2.—(1) A steam-vessel when underway shall carry—

- (a) in the forepart of the vessel above the awning roof a bright white light so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of such vessel, *viz.*, from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 2 miles ;
- (b) on the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 1 mile ;
- (c) on the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 1 mile.

(2) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

Article 3.—(1) A steam-vessel when towing other vessels which are lashed alongside shall have the white masthead light and the red and green side-lights so placed that they will be visible as set forth in Article 2 (1).

(2) When vessels are being towed alongside the side-lights prescribed in Article 2 (1) (b) and (c) shall be carried on the outermost side of the outermost vessel on each side. None of the other vessels shall exhibit side-lights.

(3) In cases in which a flat or other vessel is being towed by two steam-vessels lashed alongside on each side they shall have the white masthead light and the red and green side-lights so placed that they will be visible as set forth in Article 2 (1), *i.e.*, the white light prescribed in Article 2 (1) (a) shall be carried on the vessel towed, the green and red lights prescribed by Article 2 (1) (b) and (c) being carried by the steam-vessels lashed to the starboard and port sides respectively of the vessel towed. Such steam-vessels together with the vessel towed by them shall be taken as one vessel for the purpose of this rule.

(4) A steam-vessel when towing other vessels astern shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other not less than 3 feet apart in the fore part of the vessel. Each of these lights shall be of the same construction and character as the light prescribed in Article 2 (a).

Article 4.—All vessels under oars or sails when under way, and all vessels being towed astern shall not be obliged to carry the lights mentioned in Article 2 (1) (b) and (c) but if they do not carry them they shall, in those cases where there is a mast, carry thereon a white light in a lantern so constructed as to show a clear, uniform and unbroken light visible all round, and in those cases where there is no mast, shall show continuously a similar white light from a conspicuous position so as to be visible all round.

Article 5.—A vessel which is being overtaken by another, shall show from her stern to such last mentioned vessel a white light.

Article 6.—Every vessel, when at anchor, or made fast to the shore or to a jetty or landing stage or to another vessel not underway, shall carry where it can best be seen, a white light in a lantern so constructed as to show a clear, uniform and unbroken light visible all round at a distance of at least 1 mile.

A vessel aground in or near a fairway shall carry the above light.

Article 7.—A steam-vessel using the electric search-light shall on meeting another throw the light broadly on that side of the river which she intends to take. When a steam-vessel makes fast to allow another such vessel to pass, the search-light of the stationary vessel shall be either extinguished or be kept broad on the bank until the moving vessel has passed.

Article 8.—Whenever a red cone or red flag is hoisted by a dredger it shall be taken as a warning by other vessels not to pass her as she is engaged in dredging.

Sound Signals for Fog, etc.

Article 9.—All signals prescribed by this article for steam-vessels underway shall be given on the whistle or siren.

The words "prolonged blast" used in these rules shall mean a blast of from 4 to 6 seconds duration.

A steam-vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and also with an efficient bell.

In fog, mist or heavy rain-storms, whether by day or by night, the signals shall be used in the following manner:—

- (a) A steam-vessel having way upon her shall sound at intervals of not more than two minutes, a prolonged blast.
- (b) A steam-vessel underway, but stopped and having no way upon her, shall sound at intervals of not more than two minutes two prolonged blasts, with an interval of about one second between them.
- (c) A steam-vessel, when at anchor, shall at intervals of not more than one minute, ring the bell rapidly for about five seconds.

Speed of Ships to be Moderate in Fog, etc.

Article 10.—(1) Every steam-vessel shall, in a fog, mist or heavy rain-storms, proceed at a moderate speed, having careful regard to the existing circumstances and condition.

(2) A steam-vessel hearing apparently forward of her beam, the fog-signal of any other vessel, the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

General Warning Signals.

Article 11.—One prolonged blast shall be given to convey a warning in the following cases:—

- (a) When a steam-vessel approaches her destination.
- (b) To attract the attention of other vessels, especially native craft.
- (c) On approaching a bend in the channel.

STEERING AND SAILING RULES.

Article 12.—When two steam-vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard so that each may pass on the port side of the other.

This Article only applies to cases where vessels are meeting end on, or nearly end on, in such manner as to involve risk of collision and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other, and by night, to cases in which each vessel is in such a position as to see both the sidelights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course, or by night to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead; or where both green and red lights are seen anywhere but ahead.

Article 13.—When two steam-vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Article 14.—When a steam-vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam-vessel shall keep out of the way of the sailing vessel.

Article 15.—Where by any of these rules one of two vessels is to keep out of the way the other shall keep her course and speed.

Provided that when, in consequence of thick weather or other cause, the vessel which should be given way to, finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision.

Article 16.—Every steam-vessel, which is directed by these rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Article 17.—Every steam-vessel, which is directed by these rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

Article 18.—Notwithstanding anything contained in these rules, every steam-vessel overtaking any other shall keep out of the way of the overtaken vessel.

Every steam-vessel coming up with another vessel from any direction more than two points abaft her beam, *i.e.*, in such a position with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's sidelights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Article 19.—In narrow channels every steam-vessel shall, when it is safe and practicable, keep to that side of the fairway or midchannel which lies on the starboard side of such vessel.

Article 20.—In obeying and construing these rules due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

Article 21.—When two steam-vessels, with or without flats in tow, meet in a narrow channel or at a place where the presence of a third vessel makes it difficult to pass, the one going against the current shall slacken her speed until the other has passed clear or when meeting at the bend of a narrow river or channel the vessel going against the current shall stop and remain under the point until the other vessel has passed clear.

Exception.—In straight or nearly straight reaches of a river or channel that is so narrow that it will not allow two steam-vessels meeting, with or without flats in low, to pass each other without one of them stopping and making fast to the bank, the vessel proceeding with the current shall make fast to allow the vessel going against the current to proceed past at a slow speed. If it is necessary to cast off a flat or flats, the vessel going against the current shall drop one flat astern and if there is still insufficient room then the vessel that is made fast shall also cast off one of her flats.

Article 22.—When two vessels meet in large rivers, such as the Brahmaputra or Ganges, where shoals and narrow channels are encountered, the upward steamer proceeding against the current shall stop below the shoal giving the downward steamer proceeding with the current a clear fairway.

Article 23.—No steam-vessel shall attempt to strive or race against another. When steam-vessels are proceeding in the same direction, but with unequal speed, the vessel which is steaming slowest shall in the narrow reaches of a river offer no obstruction whatever by crossing the channel or otherwise to the free passage of the faster vessel, and shall ease and if necessary stop the engines as soon as the faster vessel comes abreast in order to allow her to pass freely. The master or pilot of the faster vessel if intending to pass, shall intimate such approach by a prolonged blast from his steam whistle. But no vessel shall pass another vessel at any of the turning points or bends of a river, or in a part of the channel so narrow that a third vessel could not with safety pass them.

Article 24.—No steam or motor-vessel shall get under way, either from her anchor or from the river bank, and turn across the river when another vessel is seen approaching from either up or down stream at such a distance that it is doubtful whether the approaching vessel can safely pass her before the turning round or crossing of the river is completed.

Article 25.—When two steam-vessels proceeding in opposite directions are likely to meet at the junction of two rivers, the vessel in the wider of the two streams shall not attempt to enter the narrower river, until the vessel in such latter river has passed out.

Sound Signals for Vessels in Sight of one another.

Article 26.—The words “short blast” used in this rule shall mean a blast of about one second’s duration.

Every steam-vessel under way shall, when in sight of any other vessel, in taking any course authorised or required by these rules, indicate that course by the following signals on her whistle or siren, *viz.*:—

One short blast to mean, “I am directing my course to starboard.”

Two short blasts to mean, “I am directing my course to port.”

Three short blasts to mean, “My engines are going full speed astern.”

Proper Precautions to be Taken in all cases.

Article 27.—Nothing in these rules shall exonerate the owner, or master, or crew of any steam-vessel from the consequences of any neglect to carry lights or signals or of any neglect to keep a proper lookout, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

NOTE.—The practice of conning inland steam-vessels from a position alongside of, or between, flats which obstruct the view, will be considered a breach of this article. Navigation should be controlled from a position which gives a clear view ahead and to two points abaft the beam on either side.

Penalty for Disobedience of the Rules.

Article 28.—Any person committing a breach of any of these rules shall, for each offence, be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Legislative Assembly on the 22nd March, 1928 :—

LEGISLATIVE ASSEMBLY BILL NO. 19 OF 1928.

A Bill to alter the order in which certain heirs of a deceased Hindu dying intestate are entitled to succeed to his estate.

WHEREAS it is expedient to alter the order in which certain heirs of a deceased Hindu dying intestate are entitled to succeed to his estate ; It is hereby enacted as follows :—

Short title, extent and application.

1. (1) This Act may be called the Hindu Law of Inheritance (Amendment) Act, 1928.

(2) It extends to persons subject to the Law of the Mitakshara country who, but for the passing of this Act, would have been subject to the said law, whether as a paramount authority or not, in respect of the provisions herein enacted : but it applies only in the case of the property of Hindus, not being held in coparcenary and not having been disposed of by will, to which the succession opens after the thirty-first day of July 1928.

Definitions.

2. In this Act,—

- (a) "Hindu" means a person of the male sex governed by the Mitakshara law of inheritance ;
- (b) "order of succession" means the order in which, according to the Mitakshara law of inheritance as administered in the territories to which this Act extends, the relations of a deceased Hindu succeed to his estate or to any portion thereof ; and
- (c) "son" includes an adopted son, provided that, in the case of the adoption of a son to a sister's husband, the adoption has been made with the consent of that sister during her lifetime.

Order of succession
of certain heirs.

3. A son's daughter, daughter's daughter, sister, and sister's son shall, in the order so specified, be entitled to rank in the order of succession next after a father's father and before a father's brother.

Savings.

4. Nothing in this Act shall—

- (a) affect any special family or local custom having the force of law, or
- (b) vest in a son's daughter, daughter's daughter or sister an estate larger than, or different in kind from, that possessed, according to the Mitakshara law of inheritance as administered in the territories to which this Act extends, by a female in property inherited by her from a male, or
- (c) enable more than one of several sons' daughters, daughter's daughters, sisters or sister's sons to succeed by inheritance to the estate of a deceased Hindu male which by a customary or other rule of succession descends to a single heir.

STATEMENT OF OBJECTS AND REASONS.

(1) This Bill is a revival of a similar Bill introduced by the late Mr. T. V. Seshagiri Ayyar and passed by the first Assembly on the 27th March 1923. Its consideration in another place was moved on the 19th July 1923, but postponed to the next session, when no further action being taken, the Bill was suffered to lapse.

(2) The Bill is intended to remove a sex disqualification which under the archaic rules of Hindu Law excludes one's nearest female relations, *e.g.*, the sister, the son's daughter and the daughter's son, from inheritance altogether, while it gives the sister's son a very low place amongst *bandhus* who can only take in the absence of *gotraja sapindas* and *samanodaks*, that is to say, the owner's agnatic relations even up to the 14th and later degrees, which gives him a very poor chance of succession in many cases. This condition is somewhat ameliorated in the case of persons subject to the Mayukh law where usage has given female heirs a somewhat better position, though in the case of persons subject to the Dayabagh School of Law certain *bandhus* are not considered inferior to the *gotrajas*: till even under that system the sister is not an heir though the sister's son is expressly mentioned in the Dayabagh as the heir while the son's daughter and the daughter's daughter have no place at all. In fairness to Bengal the Bill should have been extended even to that Province but an objection was taken in the first Assembly to its extension to that Province and its provision was, therefore, restricted to the two Provinces of the Mitakshara country.

(3) The Bill is intended to include the son's daughter, daughter's daughter, and the sister amongst heritable *bandhus* which they are not under the Hindu Law, and improves the position of the sister's son by placing him immediately after the grandfather but before the grand uncle.

(4) This does not exhaust a very large number of female relations, *e.g.*, the son's son's daughter, the brother's daughter, the sister's daughter, who still remain outside the pale of heritable *bandhus*. But the Bill being merely a revival of the Bill already passed by the Assembly it is not proposed to enlarge upon its provisions for the present, though the whole law of Hindu inheritance is unsatisfactory and does not follow the line of affinity and affection, placing as it does agnatic kinsmen however remote above all cognatic relations however near.

(5) The Bill will not make any serious inroad upon the law as understood in the Province subject to Mayukh, nor will it seriously affect the law as understood in the Province of Madras where female *bandhus* are allowed to rank but only after all the male *bandhus* are exhausted.

(6) The previous Bill passed by this Assembly was limited only to the two Provinces of Madras and United Provinces, but the reason for this limitation is not understood nor was it clear to the Council of State who gave it as one of their reasons for postponing its consideration. It is hoped that the small Bill intended to rectify a glaring injustice to one's nearest relations will receive the same support as its predecessor and that this time it will find a place on the Statute-book.

193 A. If at any time, either before or during construction of a work estimated to cost not less than Rs. 1,000, any officer, of a rank not lower than that of a Divisional Officer, in charge of a work finds that the original estimate is excessive and that the tenders for the work received are based on rates not less than 10 per cent lower in case of projects costing up to Rs. 50,000 and not less than 5 per cent lower in case of projects costing over Rs. 50,000, he should sanction a revised estimate for it on the basis of the tenders received, even though the amount of such revised estimate may exceed that to which he is ordinarily empowered to accord sanction. In cases where detailed sub-heads are not required to be maintained under Public Works Department letter No. 1428-33 A., dated the 28th March 1924, sanction may be accorded to the reduced amount without revising abstracts of cost, but in the case of estimates for which detailed sub-heads are required to be maintained in the register of works the reduced amount should be arrived at by revising the abstracts of estimates.

2. The officer according sanction to such a revised estimate should at the same time reduce correspondingly the appropriation made to meet the cost of the work.

3. The Divisional Officer's power to pass excesses over such revised estimates will be restricted to 5 per cent, of the reconstructed estimate and to the limit of his power to sanction estimates technically.

47. Every certifying surgeon shall take the names and certificate numbers of all children who have been granted provisional certificates since his previous visit, and who are not produced at the time of his visit, and shall forward the same to the Inspector together with a notice of the action taken by him under rule 54.

48. If so required by a manager or occupier, or by a person, or by the parents of such person if he be a child, with respect to whom he has refused or revoked a general medical certificate, or refused, suspended, or revoked, a Scheduled Worker's Medical Certificate, the certifying surgeon shall state in writing his reasons for such refusal, suspension, or revocation.

49. Every registered practitioner authorised under rule 36 to act as an examining surgeon shall grant general medical certificates and Scheduled Worker's Medical Certificates in the manner described in rules 42, 43, 44, 45 and 46, provided that such certificates shall have the word "Provisional" printed or stamped on the foil, and that the left thumb mark of the person in respect of whom the certificate is granted shall be taken on the counterfoil only; and provided that a certificate so granted shall lapse and become invalid on a date three months after it was granted, unless it is confirmed by the certifying surgeon or cancelled by him under rule 51.

50. A certificate issued by an examining surgeon shall be deemed to have been confirmed by the certifying surgeon only when such certificate has in the presence of the certifying surgeon been impressed with the left thumb mark of the person in respect of whom it has been granted, and when the counterfoil has been signed by the certifying surgeon, and when the certifying surgeon has placed his initials against the deletion of the word "Provisional."

The thumb mark taken on the foil should be identical with that previously taken on the counterfoil.

51. On every visit of the certifying surgeon, the manager shall produce before him, at such time as the certifying surgeon may fix, all children employed in the factory, whether actually at work or not, who are not in possession of general medical certificates, and all scheduled workers employed in the factory, whether at work at that time or not.

52. The certifying surgeon shall personally examine every child who is in possession of a provisional certificate granted under section 8, and shall, if satisfied as to its correctness, confirm it in the manner prescribed in rule 50 and return it to its owner.

53. If the certifying surgeon is of opinion that the person examined is under the age of 12 years or is not fit for employment in a factory, he shall retain the certificate, write on it the word "Cancelled," sign and date the same, and shall return the certificate with such remarks, if any, as he may think fit to make, to the examining surgeon who granted it.

This rule shall only apply to those areas notified by the local Government in the local official Gazette.

INSPECTORS AND INSPECTION.

79. Powers of Inspectors.—An Inspector may, together with such assistants, if any, as he may think fit to bring, enter any place within the area for which he is appointed, which is, or which he has reason to believe to be, used as a factory ; and there make such examination of the premises, ways, works, machinery and plant, and of all registers or other prescribed records as may be necessary for the purposes of the Act ; and he may take on the spot or otherwise, such evidence of any persons as he may think necessary to examine.

80. In addition to the powers mentioned in rule 79, an Inspector may, subject to such restriction as may be notified by the local Government with regard to him, exercise such other powers as may be necessary for carrying out the purposes of the Act.

81. Obstructing an Inspector.—The manager or occupier of a factory shall not obstruct or permit to be obstructed by any person in the factory an Inspector in the exercise of his duty, and shall not fail to produce on demand by an Inspector any registers or other documents prescribed by these rules and shall not conceal, or prevent or attempt to prevent, any person employed in the factory from appearing before, or being examined by, an Inspector ; and shall not withhold such information as the Inspector may require under these rules ; provided that no person in any factory shall be required to answer any question of, or to give any evidence to, an Inspector tending to criminate himself.

82. Duties of an Inspector.—The Inspector shall give to the manager or occupier of every factory within the local limits for which he is appointed such orders as may be required to bring the factory and the persons therein employed into complete conformity with the Act and these rules. Such orders shall be confirmed in writing.

83. A Register of Factories compiled from information received on Form A shall be maintained by the Chief Inspector of Factories, and an extract giving details of factories for each district shall be sent on or before the 15th February of each year to the District Magistrate concerned. All changes in the list which may be made in pursuance of rules 5, 6, 7, 75 and 76 shall also be intimated to the District Magistrate as and when such changes are made.

84. Every Inspector subordinate to another Inspector shall furnish the latter with all such reports and information as may be necessary to him for the proper execution of his duties.

85. Responsibilities of Inspector.—The Chief Inspector shall be primarily responsible for the administration of the Act in all areas of the Province. The extent of the responsibility of each other Inspector shall be in accordance with the powers conferred upon him as declared by notification under sub-section (5) of section 4. In order that he may satisfy himself that the provisions of the Act and of these rules are duly observed, an Inspector shall make such inspections of factories as may appear to be necessary to him, or to the authority to whom he is subordinate.

86. The Inspector shall, at each inspection of a factory, satisfy himself that the provisions of the Act and of these rules relating to the health and safety of the persons employed therein, are duly observed ; that the children employed in the factory have been duly certified and that the prescribed register of children is properly maintained ; that the hours of employment of all persons working in the factory are properly and continuously recorded in the prescribed register ; that the periodical stoppages of work and the prescribed holidays are granted ; that the prescribed limits of hours of work are not exceeded and that the prescribed abstracts and notice are duly maintained and fixed

under section 36 ; and he shall note how far defects pointed out at previous inspections have been removed, and how far orders or recommendations previously issued have been complied with.

87. The Inspector at each inspection shall enquire, sufficiently to ascertain where the responsibility for their occurrence rests, into all accidents which may have taken place since the last inspection, and shall pass such orders or recommendations as may be proper for the prevention of such accidents. The Inspector shall report all such enquiries made by him, and a copy of the report shall be sent to the manager or occupier of the factory concerned.

88. **Report of Inspection.**—As soon as practicable after inspection, the Inspector shall report upon such conditions of the factory as are contrary to the Act or to these rules or as may seem to him to require comment. A copy of such report shall be sent to the manager or occupier.

89. Such extracts from the report of an Inspector made under rules 86, 87 and 88, as may be necessary for his information, shall be furnished to the District Magistrate by the Inspector, either directly, or through the Chief Inspector.

90. In the case of factories situated in places coming under the Municipal Act, if it appears that there has been a disregard of the provisions of any municipal or other local Act relating to sanitary arrangements, removal of objectionable rubbish, the cleaning and fencing of water tanks or the like matters, the Inspector shall, without prejudice to any action which he is empowered to take under the Act and rules, draw the attention of the Chairman of the municipality or other local body to the breach of the sanitary regulations in question.

91. **Inspection by District Magistrate or Additional Inspector.**—When in any area the District Magistrate or an additional Inspector exercising all or any of the powers of an Inspector makes an inspection, a copy of his note on the inspection shall be sent to the whole-time Inspector appointed for that area for such action as the latter may think necessary, as well as to the manager if the Magistrate considers it desirable.

92. **Disuse of Dangerous Plant.**—Pending the execution of an order under rule 82, the Inspector may, when there is imminent danger to human life, prohibit the use of that part of the ways, works, machinery or plant to which the order relates.

93. **Inspector's Records.**—Every Inspector shall keep a record of all orders and remarks made by him relating to each inspection.

94. Any certificate, order, letter, report, or other document issued by an Inspector of Factories or other officer duly appointed in this behalf by the Government or by a Municipality or by other public body, with respect to the fitness or safety of the factory or any portion of its buildings, works, plant, machinery, apparatus, or ways, or with respect to the fitness of persons employed in the factory, shall be properly filed and exhibited to the Inspector on his demand.

95. A request by the Inspector for information necessary to establish—

- (a) the observance or otherwise of any provision of the Act,
- (b) the execution or observance of any order of an Inspector, or
- (c) the condition, age, or history of any part of the factory, its plant, machinery, apparatus, or ways, so far as such may be an indication of safety or danger in the use of such objects,

if made during an inspection, shall be complied with forthwith by the manager or occupier if the information is available in the factory ; and if made by letter, shall be complied with by the manager or occupier within seven days from the date of receipt, or as soon afterwards as the information can be obtained.

96. **Appeal against an Order of an Inspector.**—Any person on whom an Inspector has served one or more of the following orders may, within 14 days from the receipt of such order or orders, appeal in the form prescribed

in rule 78 to the Commissioner. The appellate authority may confirm, modify or reverse the order or orders :—

- (a) An order specifying the measures to be taken to remove conditions of danger which the Inspector considers to exist in contravention of rule 8, 9 or 10.

- (g) An order prohibiting the presence in a factory or in any part of a factory of children whose age is less than that at which they may be legally employed in a factory, which the Inspector considers to be required under section 19A.

97. When an appeal against the order of an Inspector is presented under rule 96, the appellate authority may, and, if so requested by the appellant in his petition of appeal, shall, hear the appeal with the aid of two assessors.

98. When assessors are to be employed in the hearing of an appeal against the order of an Inspector, the appellate authority shall call upon the body which is considered most representative of the industry concerned to appoint one of the assessors within a period of fourteen days. When such assessor has been so appointed, the appellate authority shall appoint the other assessor; and shall then fix the place, day and time for hearing the appeal, of which due notice shall be given to the appellant and to the Inspector against whose order the appeal has been presented, and shall call upon the two assessors to appear and assist in the hearing of the appeal at the appointed place and time :

Provided that if no assessor is appointed by the aforesaid body within the prescribed period, or if the assessor so appointed fails to attend at the appointed time and place, the appeal may be heard without such assessor, or, if the appellate authority thinks fit, without the aid of any assessor, unless the appellant at whose request the assessor was appointed objects to the hearing of the appeal.

99. An assessor appointed under rule 98 shall receive a fee of Rs. 32 and travelling expenses for assisting in the hearing of the appeal. Such fees and travelling expenses shall be paid by the local Government, except that in cases wherein the assessors have been appointed at the request of an appellant against whom the appeal is decided wholly or partly, the appellate authority may direct that the fees and travelling expenses shall be paid wholly or in part by such appellant.

100. **Suspension of Orders while under Appeal.**—When an appeal is presented against the order of an Inspector, unless it is an appeal under clause (g) of rule 96, the appellate authority may, on the application of the appellant, suspend the operation of the order of the Inspector pending the decision of the appeal; but where no such suspension has been granted, the Inspector's orders shall be complied with, notwithstanding that the appeal against it has been presented.

W. H. NELSON,

Secretary to the Government of Bengal (offg.).

Notifications—By the Government of India, Department of Education, Health and Lands.

Simla, the 2nd May 1928.

NOTICE.

A competitive examination for admission to the Indian Forest Service will be held at Delhi beginning on Monday, the 20th August 1928, under rules which have been framed by the Secretary of State for India in Council and which are printed at pages 457 to 462 of this Gazette*. Candidates accepted for admission to the examination will be informed at what place in Delhi and at what hour they should present themselves.

1. The number of candidates to be selected at this examination will be announced hereafter. The number of appointments which will be announced for competition will not represent the total number of vacancies to be filled in India, since certain vacancies will be reserved and will be filled, if necessary, by nomination for the purpose of adjusting Communal inequalities which may arise from the result of the examination.

2. No candidates will be admitted to the examination from whom the Authority mentioned below has not received on or before the 16th June 1928, an application on the prescribed form accompanied by the necessary documents. Copies of the Application Form may be obtained from that Authority.

3. The application must be made to the proper Authority for the area in which the candidate's parents reside at the time of the application, or of an area in which they have previously resided for a period of not less than three years, or in which he has himself resided, otherwise than as a student at a University only, for a like period.

The proper authority is for a Governor's Province, the Chief Secretary; for Coorg, the North-West Frontier Province, Delhi, Ajmer-Merwara, Baluchistan or Andaman and Nicobar Islands, the Chief Commissioner; and for a State in India, the Political Officer or Agent, who should be addressed through the Durbar.

4. No allegation that an Application Form or letter respecting such Form has been lost or delayed in the post will be considered unless the person making such allegation produces a Post Office Certificate of posting. Candidates who delay their applications until a late date will do so at their own risk.

Note.—With reference to the note to rule 9 the Governor General in Council has, with the approval of the Secretary of State for India in Council, relaxed the condition imposed by that rule so as to admit to this examination the following four classes of Indian students who have undergone at their own expense a course of Forestry outside India and have thereby been prevented from entering for the examination in India for admission to the Indian Forest Service :—

- (a) Those who were not debarred by age from appearing at the competitive examination in 1926, i.e., were under 23 then, but were too old to appear at the examination in 1927 by reason of being over 23 on the 1st April 1927.
- (b) Those who had obtained a degree or diploma in Forestry and were under 25 years of age on the 30th June 1926.
- (c) Those who were qualified to take the examination in 1927, but did not do so perhaps on account of short notice, and are over age this year.
- (d) Those who, having obtained a diploma or degree in Forestry, were under 25 on the 30th June 1927.

These concessions will not operate to allow any of the candidates in question who has appeared once at the examination to appear a second time and are confined to Indian students who were undergoing forestry training outside India in 1926 or 1927.

No. 592.—In exercise of the powers conferred by sub-section (2) of section 96B of the Government of India Act, the Secretary of State for India in Council has made the following rules to regulate recruitment for the Indian Forest Service:—

- (e) by the transfer or promotion in accordance with part VI of these rules of an officer belonging to a branch of Government Service in India other than a Provincial Forest Service.

3. (1) All appointments to the Indian Forest Service shall be made by the Secretary of State for India in Council.

(2) No appointment shall be made to the Indian Forest Service by any method not specified in rule 2.

(3) Subject to the provisions of sub-rule (2) the method or methods of recruitment to be employed for the purpose of filling any particular vacancies in the Indian Forest Service or such vacancies therein as may be required to be filled during any particular period, and the number of candidates to be recruited by each method, shall be determined by the Secretary of State in Council.

PART II.—APPOINTMENT BY NOMINATION IN ENGLAND.

4. Candidates shall have attained the age of 21 and shall not have attained the age of 24 on the 1st January of the year of candidature. They shall be unmarried, and if they marry before reaching India, shall forfeit their appointments.

5. No person shall be deemed eligible for appointment who is not a male and who does not satisfy the Secretary of State for India in Council—

- (a) that his character is such as to qualify him for employment in the Indian Forest Service;
- (b) that he is a British subject of non-Indian domicile;
- (c) that if he (being a British subject of non-Indian domicile) or his father or his mother was not born within His Majesty's dominions and allegiance, then at the time of his birth his father was a British subject and still is, or continued to be until his death, a British subject.

PART III.—APPOINTMENT BY COMPETITIVE EXAMINATION IN INDIA.

6. A candidate must be a male and either—

- (i) a British subject of Indian domicile who was, and whose father and mother were, born within His Majesty's Dominions and allegiance, or

- (iii) a ruler or a subject of a State in India in respect of whom the Governor General in Council has made a declaration under Section 96A of the Government of India Act.

7. A candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the efficient performance of the duties of a member of the Indian Forest Service, and a candidate who is found after examination by a Medical Board not to satisfy these requirements will not be appointed.

8. A candidate must satisfy the Public Service Commission that his character is such as to qualify him for employment in the Indian Forest Service.

9. A candidate must have attained the age of 19 and not have attained the age of 23 on the 1st day of April in the year in which he is accepted for admission to the competitive examination.

Note.—The Governor General in Council may, with the approval of the Secretary of State for India in Council, relax this condition in special cases in respect of the competitive examinations to be held in 1928 and 1929.

10. A candidate must have passed the examination necessary to qualify him for the degree of a University approved by the Governor General in Council or the Senior Diploma of the Mayo College, Ajmer. In exceptional cases the Public Service Commission may treat as qualified under this rule, a candidate who, though not possessing the foregoing qualifications, has passed examinations conducted by other institutions of a standard which in the opinion of the Public Service Commission justifies their admission.

11. The competitive examination shall be conducted in accordance with regulations made by the Governor General in Council, and such fees may be charged to candidates as may be prescribed in those regulations.

12. A list of the candidates shall be made in order of their proficiency as disclosed by the aggregate marks finally awarded to each candidate, and in that order so many candidates up to the determined number of appointments as are found by the Public Service Commission to be qualified by examination shall be designated to be selected candidates for the Indian Forest Service, provided that the Governor General in Council is satisfied that they are duly qualified in other respects. Should any selected candidate become disqualified, the candidate next in order of merit and in other respects duly qualified shall be deemed to be a selected candidate.

13. The selected candidates will be required to undergo satisfactorily a course of training at the Forest College, Dehra Dun, in accordance with such regulations as the Governor General in Council may prescribe.

PART IV.—APPOINTMENT BY SELECTION IN INDIA OTHERWISE THAN BY COMPETITIVE EXAMINATION.

14. The Governor General in Council shall call on the Public Service Commission to recommend and arrange in order of preference such number of candidates as he may direct to be selected with regard to the community to which they belong or to such other considerations as he may prescribe.

15. The candidates so recommended shall possess the qualifications specified in rules 6, 7 and 8, and the recommendations shall be made primarily from the list of candidates who have sat at the last preceding competitive examination held in India for the Indian Forest Service, and have attained a qualifying standard. Candidates may, however, also be recommended whose names are not included in that list and the Public Service Commission may, if they consider it necessary, call for fresh names in such numbers and from such local Governments as the Governor General in Council may direct.

16. The Governor General in Council shall forward to the Secretary of State for India in Council the recommendations made by the Public Service Commission and shall propose candidates for appointment as selected candidates.

17. The selected candidates will ordinarily be required to undergo satisfactorily a course of training at the Forest College, Dehra Dun, as laid down in rule 13.

PART V.—APPOINTMENT BY PROMOTION FROM THE PROVINCIAL FOREST SERVICES.

18. Where recruitment is to be made by promotion from the Provincial Forest Services it shall be made in accordance with rule 6 of the Public Service Commission (Functions) Rules, 1926; or any variation thereof for the time being in force.

PART VI.—APPOINTMENT BY TRANSFER OR PROMOTION FROM A SERVICE OTHER THAN A PROVINCIAL FOREST SERVICE.

Note.—Nothing in the above rules applies to recruitment for the Indian Forest Service in Bombay and Burma, since recruitment to the service in those provinces has been discontinued.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

No. 159T. L., dated Darjeeling, the 19th May, 1928.—The following report of the Select Committee on the Bengal Village Self-Government (Amendment) Bill, 1928, with the Bill as amended by the Committee, is hereby published for general information :—

REPORT OF THE SELECT COMMITTEE ON THE BENGAL VILLAGE SELF-GOVERNMENT (AMENDMENT) BILL, 1928.

We the undersigned members of the Select Committee, appointed by the Legislative Council on the 27th March, 1928, to consider the Bengal Village Self-Government (Amendment) Bill, 1928, have considered the provisions of the Bill, and the following papers relative thereto:—

Paper No. 1.

- (1) Letter Nos. 399-403 L., dated the 8th February, 1928, to all Commissioners of Divisions, inviting opinions of the District Officers and District Boards on the provisions of the Bill.
- (2) Notification No. 405 L., dated the 9th February, 1928, publishing the Bill in the *Calcutta Gazette* for public criticism.
- (3) Letter No. 1711 J., dated the 8th March, 1928, from the officiating District Magistrate of Faridpur, expressing an opinion on the provisions of the Bill.

- (4) Letter No. 827 M., dated the 19th March, 1928, from the Commissioner of the Rajshahi Division, expressing an opinion on the provisions of the Bill.
- (5) Letter No. 1181 G., dated the 21st March, 1928, from the Commissioner of the Chittagong Division, with enclosure, expressing an opinion on the provisions of the Bill.
- (6) Letter No. 74 L. S.-G., dated the 22nd March, 1928, from the Commissioner, Presidency Division, with enclosure, expressing an opinion on the provisions of the Bill.
- (7) Letter No. 1521 J., dated the 22nd March, 1928, from the Commissioner of the Dacca Division, with enclosure, expressing an opinion on the provisions of the Bill.

Paper No. 2.

Letter No. 673 L. S.-G., dated the 26th March, 1928, from the Commissioner of the Burdwan Division, expressing an opinion on the provisions of the Bill.

We have the honour to submit this our report with the Bill, as amended by us, annexed.

The Bill was published in English in the *Calcutta Gazette* on the 26th January, 1928.

2. The Committee met on the 3rd April, 1928.

3. *Clause 2.*—The Committee was of opinion that clause 2 of the Bill should be revised so as to confer power upon union boards or a combination of union boards to make money contributions to institutions or undertakings not actually under their control, and also so as to extend their powers of combination to include the undertaking of all works of public utility which a union board may undertake under the Act. We have redrafted the clause to this end.

We have omitted the words “or part of a district” in sub-section (1) as being unnecessary, and we have inserted the words “from time to time” in sub-section (3) of the proposed new section, to ensure the power of revising an allocation of cost once made. We have rejected the proposal to make the wording mandatory, preferring by retaining the word “may” to leave to the union boards unfettered discretion in the exercise of the powers which the Bill is designed to confer on them.

Clause 3.—We have inserted the words “from time to time,” in order to secure to union boards power to withdraw all or any of the powers delegated to the committees.

Clause 4.—We consider it advisable to safeguard the powers of control of the Commissioner and the District Magistrate, as well as those of the District Board.

Clause 5.—We have made provision herein for the determination of the number of members to be furnished by the several union boards to the committees and for the settlement of subsidiary matters, such as the supervision of the proceedings of the committees by the union boards, and the revision of the committee upon any change in the circumstances of the constituting union boards.

4. We do not consider that the Bill has been so altered as to require republication.

5. We recommend that the Bill as amended by us be passed.

***Bills Introduced in the Council of State and Legislative Assembly,

Assembly and Bills published under Rule 18 of the Indian
Legislative Rules.***

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Legislative Assembly on the 9th February, 1928 :—

LEGISLATIVE ASSEMBLY BILL NO. 10 OF 1928.

A Bill to repeal the Caste Disabilities Removal Act, 1850.

WHEREAS it is expedient to repeal the Caste Disabilities Removal Act, 1850; It is hereby enacted as follows :—

XXI of
1850.

Short title,
extent and
commencement.

1. (1) This Act may be called the Caste Disabilities Removal Repealing Act, 1928.

(2) It extends to the whole of British India.

(3) It shall come into force at once.

Repeal of Act XXI
of 1850.

2. The Caste Disabilities Removal Act, 1850, is hereby repealed.

XXI of
1850.

STATEMENT OF OBJECTS AND REASONS.

The Caste Disabilities Removal Act (XXI of 1850) has created an anomaly. As pointed out in 64 I. C. 514 in a case from Burma, the Burmese Buddhist relations of the deceased, who became a convert to Muhammadanism, do not inherit from him, though he would have inherited from them. There is thus no reciprocity and there is no particular merit in allowing an apostate to inherit from his previous relations, whose

religion and law he has abandoned, while under the law to which he has become subject they cannot inherit from him. The legislature in Act XXIX of 1923, the Special Marriage Amendment Act, has, by permitting the adoption by the father in the case of a son marrying under the Act, approved the principle of applying the rule of civil death to such person, who renounces the essentials of Hindu religion, though section 23 of this Act allows such persons to succeed as heirs.

This provision is not intended against any community and would be applicable to the cases of persons who become converts to Hinduism from Muhammadanism.

The Caste Disabilities Removal Act was purely a Government measure and does not represent the will of the people.

DEPARTMENT OF AGRICULTURE, BENGAL.

Third and Final Forecast of the Spring Oilseed crops of Bengal, 1927-28.

(NOTE.—On an average of the five years ending 1925-26, the area under linseed in Bengal has represented some 3·4 per cent. and that under rape and mustard 11·6 per cent. of the total area under these crops in British India.)

Character of the Season.—In the second forecast the weather was reviewed as having been favourable in the early stages of the season; but lack of adequate soil moisture since the latter part of October affected later sowings and development of early sown crops, especially in parts of West and North Bengal. Late sown crops also suffered through absence of rain, although rainfall in the end of January somewhat improved their prospects. On the whole, the season was fair in East and parts of North Bengal, while elsewhere it was generally unfavourable.

Acreage.—(Oilseeds are principally grown in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions the cultivation is small. The total area under these crops (excepting sesamum, for which separate forecasts are issued) is estimated at 900,600 acres this year as against 936,500 acres last year.

Outturn.—From the District Officers' estimates the provincial outturn of the different oilseed crops works out at 69 per cent. of the normal as against 78 per cent. last year.

Taking 5½ maunds as the normal rate of yield per acre for linseed, 6 maunds for rape and mustard and 4½ maunds for other oilseeds, the total yield of the crops for the province is estimated at 133,500 tons this year as against 146,900 tons or about 15 per cent. less than last year.

DEPARTMENT OF AGRICULTURE, BENGAL.**Final Forecast of the Wheat Crop of Bengal, 1927-28.**

NOTE.—On an average of the five years ending 1925-26, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1925-26, averaged (a) 39·0 and (b) 14·2 per cent., respectively.

Character of the season.—In the initial stages of the season the weather was favourable for cultivation and for early sowings, but prolonged drought delayed later sowings and affected the growth of early crops in the high land tracts. Rainfall in the months of January and February improved prospects to some extent in the important district of Mulda, but full recovery was impossible. Excepting in Mymensingh, Jalpaiguri, Darjeeling and Rangpur, the season was altogether unfavourable for the crop.

Acreage.—According to the estimates of District Officers, the total area sown is 106,600 acres this year as against 129,300 acres last year.

Outturn.—The provincial outturn as worked out from the district estimates is 64 per cent. of the normal as against 81 per cent. last year.

Taking the normal yield to be 8½ maunds per acre, the gross yield of the crop for the province is estimated at 21,900 tons this year as against 32,100 tons or about 32 per cent. less than last year.

At the end of April the average wholesale price of wheat at the principal marts of the province was Rs. 6-8-8 per maund or about 4 per cent. higher and 6 per cent. lower than the prices ruling, respectively, in the corresponding period of last year and in the year preceding. The average wholesale price of common rice at the principal marts, on the other hand, was Rs. 7-7-3 per maund or about 1 and 4 per cent. higher than the prices ruling at the corresponding periods of last year and the year preceding, respectively.

DEPARTMENT OF AGRICULTURE, BENGAL.

Monthly Weather and Crop Report of Bengal for April 1928.

I. **Character of the season.**—During the first nineteen days of the month, moderate rain fell almost throughout the province, after which the weather was practically dry. The precipitation was above the average in the 24-Parganas, Bankura, Midnapore, Hooghly, Howrah, Dinajpur, Rangpur, Darjeeling and Cooch-Bihar. The usual rainfall-statement is appended.

II. **Progress of agricultural operations.**—Sowing of jute and autumn paddy was approaching completion in the lowland tracts of East and North Bengal and was in progress in the highland tracts. Weeding continued.

III. **State of standing crops.**—The condition of young jute, *bhadoi* paddy and sugarcane plants was satisfactory, although more rain was needed to help their growth.

IV. **Prospects and probable outturn.**—The prospects of sugarcane, jute and deep-water paddy were promising. The total outturns of wheat and different spring oilseed crops were 64 and 69 per cent., respectively, of the normal for the province, as a whole.

V. **Damage to standing crops.**—No appreciable damage was done to the standing crops except in the highlands, where prospects are being threatened by drought.

VI. **Condition of agricultural stock.**—The condition of agricultural stock was, on the whole, fair. Stray cases of cattle-disease were, however, reported from thirteen districts.

VII. **Failure of pasturage and fodder.**—Insufficiency of fodder was reported from parts of the 24-Parganas, Nadia, Murshidabad, Burdwan, Rajshahi and Malda.

VIII. **Prices of food-grains.**—During the second fortnight of the month the retail price of common rice of the cheapest quality rose in eleven districts, fell in two and remained stationary in the rest of the Presidency. It varied from 4½ seers per rupee in Pabna to 7 seers per rupee in Chittagong.

IX. **Condition of agricultural population.**—The condition of the agricultural population was fair, on the whole, except in parts of Nadia, Murshidabad, Birbhum, Bankura, Dinajpur and Malda, where distress continued to prevail owing to a partial failure of the winter rice crop. Test and other relief works continued to help the condition of the people of these places.

DARJEELING, THE 8TH MAY 1928.

RESOLUTION—No. 112/T.—A. I.

Minister-in-charge: The Hon'ble Sir P. C. Mitter, Kt., C.I.E.

READ—

The Report on the Working of the Co-operative Societies in Bengal for the year ending 30th June 1927.

Administration.—Rai J. M. Mitra Bahadur held the office of Registrar throughout the year. There was no change in the strength of the superior controlling staff and only one permanent change in the personnel, being due to the reversion of Rai Sahib Nripendra Chandra Bose, Asst. Registrar, to the general line as Deputy Collector. The opening of separate offices for the Assistant Registrars of the Burdwan and Chittagong Divisions has resulted in increased efficiency. Government have since the close of the

year under review approved of the strengthening both of the inspectorate and of the audit staff, the former by 12 additional posts and the latter by 24. Unfortunately, the limited funds available for new expenditure has made it impossible to include provision for more than 4 of the former and 12 of the latter in the budget for 1928-29. The full number approved of will be appointed as soon as funds permit.

A scheme for the re-organization of the service of auditors has been approved by Government. By this they are placed on a permanent basis on an incremental pay of Rs. 75—150 instead of the present fixed pay of Rs. 75, and will get the benefit of a provident fund. The new rates of pay take effect from 1st April 1927. This will allay the discontent referred to by the Registrar, and should result in more satisfactory working.

2. Generally, the number of societies shows a satisfactory increase. The total rose from 12,819 to 15,439, an increase of 20·4 per cent. as compared with an increase of 15·6 per cent. in the previous year. Membership rose from 453,031 to 547,325, an increase of 20·7 per cent. as compared with 17·4 per cent. in 1925-26. Working capital rose from Rs. 7,52,77,018 to Rs. 9,43,42,218, an increase of 25·3 per cent. as compared with 21·7 per cent. in the previous year.

Economic conditions as a whole were not unfavourable, though floods in West Bengal with concomitant loss of winter paddy and the low price of jute were disturbing factors. There was a general shortage of money, and the Provincial Bank for the first time found it difficult to cope with the demand for loans.

Gratifying as has been the steady advance of the co-operative movement in general the Hon'ble Minister would like to draw the attention of the public to the very large field of agricultural credit which yet remains to be covered. The annual value of the principal agricultural products of Bengal is in the neighbourhood of 200 crores of rupees as is shown in the statement below, yet we find it stated in paragraph 14 of the report that the annual cash employed in the movement is only 5·15 crores, a sum which covers the activities not only of agricultural but of all kinds of societies. He has no intention of attempting to force the pace in the realm of co-operative movement, a course which is bound to defeat its own end in that the strength of the movement depends wholly on a spontaneous appreciation of co-operative principles by the co-operators themselves, but some definite action does seem to be necessary for the provision of credit for the agriculturists of Bengal, and Sir Provash Mitter desires to draw pointed attention to this fact.

Statement.

Name of crop.	Outturn.	The mean harvest price per maund.	Value of the crop.
		Rs. A.	Rs.
Jute	9,281,500 bales (400 lbs.)	8 10	40,02,64,687
Rice	7,742,000 tons	7 3	1,46,32,38,000
Sugarcane (gur) ..	223,300 tons	9 8	5,72,76,450
Rape and mustard ..	112,700 tons	9 10	2,92,87,912
Sesamum (til) ..	25,300 tons		(Approximately correct price not available).
Linseed	19,000 tons	8 5	42,64,312
Total			1,95,43,31,361

In the jute trade a fair beginning has been made by the Co-operative Department and, as is well known, traders and merchants interested in the trade also provide fairly adequate arrangements for financing it. In the rice trade, on the other hand, a crop whose annual value is about 146 crores of rupees even moderately adequate arrangements for its financing at a reasonable rate of interest do not exist, and such arrangements are equally deficient in respect of the other minor crops, whose value may be estimated at over 9 crores of rupees. This is a state of affairs for which surely there must be a remedy, and the Hon'ble Minister believes that the Co-operative Department should be able to find it, provided public opinion is awakened sufficiently to interest itself in their efforts.

3. The ordinary credit societies generally worked satisfactorily. Collections fell below the high standard attained in the preceding year, being 37·8 per cent. of the total amount due as against 45·5 per cent.—a result which is attributable to the unfavourable agricultural conditions referred to above. It should be observed, however, that the best collection in the quinquennium 1920-21 to 1924-25 did not exceed 41·8 per cent. The proportion of overdue loans increased correspondingly, *i.e.*, from 24·1 in 1925-26 to 25·5 in 1926-27. The figure of 1925-26 was, however, the smallest for a decade. The Rajshahi Division, though slightly better than in the previous year, still shows the highest percentages of overdue loans outstanding. The audit classification of societies shows practically no variation as compared with previous years. Seventy-five per cent. of societies are marked "C" or "average," on either side of which the percentage falls away steeply to 8 per cent. "B" or "fair," and 1·5 per cent. "good" on the one side and 8·8 per cent. "bad" and 5·9 per cent. "hopeless" on the other.

4. The report on the working of the jute sale societies is of particular interest, and though it is too early yet to attempt to form a decided judgment as to their future, there is little doubt that substantial progress in this comparatively new line of activity has been achieved. The rivals with whom these societies have to compete are highly organized and possessed of large resources, and it is obvious that it will take time for the new comers to obtain a firm footing, while, as the Registrar indicates, it cannot be expected that great financial results will accrue at once. A cautious policy is the only wise one, and this is what the Registrar is evidently pursuing. Apart from these considerations, the only true test of success in such a venture as this is the amount of benefit that the grower of the jute obtains. As the Registrar observes, the most notable event of the year is the establishment in Calcutta of the Bengal Wholesale Society, a federation of the local societies which acts as their agent for sales in the Calcutta market, so that there will be no need to rely on extra-co-operative assistance at any stage between the cultivators' field and the jute mill. Of the other sale societies, exclusive of those connected with jute, the Gosava Paddy Sale Society had a successful year. The total number of these societies rose from 53 to 78, the new additions being nearly all concerned with jute.

5. The increased interest shown in the co-operative production of milk and milk products deserves special mention. There is an immense field for expansion in this direction, and, as the Registrar points out, improved facilities for marketing spells sooner or later improved cattle and improved cattle-keeping. Satisfied that there is money in well-bred and well-kept kine, the cattle-keeper realizes it is worth his while to obtain cows of good milking strains and to take pains over their welfare. During the year, the number of milk societies increased from 76 to 97. Eighty-two of these are in the Calcutta group and are associated into the Calcutta Milk Union, whose fine modern plant at No. 119, Bow Bazar was visited by the Royal Commission on Agriculture, and, more recently, by His Excellency. The Union earned a profit of Rs. 22,168 in the year under report, and has led to the initiation of similar organizations at Dacca and other places, and the work is expanding so rapidly that it has been decided, when funds permit, a special post of Superintendent to deal with milk work alone. The Hon'ble Minister believes a great future lies before this form of enterprise, of benefit as it is to producer no less than to consumer. It offers

too a profitable occupation for anyone who is prepared to fit himself for it. The great difficulty lies in the lack of means of obtaining instruction in the art of dairying. There is now under consideration a scheme for affording such training on modern lines at Dacca where an excellent herd of carefully selected cattle will give full scope for practical instruction, and the Hon'ble Minister is confident that when funds permit of such classes being opened they will prove instantly popular.

6. The number of co-operative agricultural associations increased from 21 to 30. But the Registrar is evidently not very satisfied with the policy that has hitherto been followed in this connection, and the Hon'ble Minister will await with interest his proposals for improvement. The account of the year's working certainly does not convey an impression of any very great activity. It is gratifying to observe that there is close co-operation with the Agriculture Department in respect of these societies.

7. Among non-agricultural societies, ordinary credit societies show an increase in membership, and have on the whole thrived well, their main function being to afford people of limited means easy credit facilities. The Calcutta societies were as before the best administered, and in the mufassal the successful working of the Chittagong Urban Bank reflects credit on its management.

The artizans' societies show little signs of expansion, and it seems probable that this is a field to the development of which the Co-operative and the Industries Departments might devote themselves conjointly with success. The Hon'ble Minister is convinced that the most feasible line of advance in respect of cottage industries is on co-operative lines. The existence of these artizan societies, few in number though they are, forms a nucleus on which to work and Hon'ble Minister hopes that efforts will be made to effect progress in this direction. The Brahmanbaria Braziers Society, for instance, now comprises nearly all the artizans in the locality. There must be other places where similar societies could be organized and their methods improved under the guidance of the Industries Department.

There was a large increase in the numbers of anti-malarial societies, *viz.*, from 269 to 450, and their working seems on the whole to have been satisfactory.

It is gratifying to observe that the women's organizations worked, with one exception, satisfactorily, and that one new society was started during the year.

8. There is little to comment on in the working of the higher industrial organizations, except to note the registration of a silk union in Malda, with 45 societies affiliated to it. The main object of this is to provide marketing facilities for the silk produced, and its career will be watched with interest.

The central banks rose from 98 to 103 in number, and are reported to have made good progress on the whole. It is satisfactory to learn that complaints as regards their attitude towards village societies are increasingly rare.

The Bengal Provincial Co-operative Bank enjoyed continued prosperity. The turnover was the same as in the preceding year, *viz.*, Rs. 5 crores. A testimonial to its stability is afforded by the increase of deposits by non-members of from Rs. 44 to 88 lakhs. Its Board of Management has received an accession of strength in Sir R. N. Mukerjee's acceptance of its chairmanship, a much appreciated proof both of his interest in the movement and of his belief in its stability.

The Bengal Co-operative Organization Society, which receives an annual Government grant of Rs. 10,000, continued to flourish, its membership increased to 9,875, and the circulation of the journals which it publishes also went up. The divisional conferences, that at Dacca coinciding with the visit of the Royal Commission on Agriculture, which were held under its auspices, were of value in allowing of the exchange of experiences and ideas

among co-operative workers and as a means of giving publicity to the movement, while the society also lent its assistance at the Dacca Agricultural Exhibition and on the Eastern Bengal Railway demonstration train. This society arranged for a training class for co-operative officers after the close of the year at the Dacca Farm. This was a great success, and Government will await with interest the Registrar, Co-operative Societies' proposals for the extension of this system of instruction.

9. The number of societies liquidated shows no very marked fluctuation, but there are a considerable number (409) of cases pending. The completion of liquidation proceedings is a troublesome process, and though there has been better progress in this respect during the last 3 years than previously, there is still room for improvement. It is to be hoped that the strengthening of the staff will contribute towards prompter disposal of these cases.

10. The Hon'ble Minister is glad to note the cordial way in which the Registrar refers to his relations with the Agriculture and the Industries Departments, both of which impinge upon the field of co-operation at numerous points. There are few individuals who have either the means or the enterprise to embark upon improved plant and methods in cottage industries or in dairying and animal husbandry (to take only two examples), but there is ample scope and opportunity for great progress in either sphere under co-operative conditions of management.

11. Sir P. C. Mitter is satisfied that the bulk of public opinion entertains nothing but feelings of good-will towards the co-operative movement. Criticism, whether interested (and therefore often unfair) or genuine, there will always be, and it should be welcomed on its merits. The main object to be kept steadily in view is the fostering of the movement on genuine, sound lines, and above all the fostering of the co-operative spirit. With a real co-operative spirit abroad, there will be no room for those petty but destructive jealousies and the internecine strife between society and society or within a single society to which the Registrar has had to refer here and there in his report.

12. The Government of Bengal in the Ministry of Agriculture have once more to acknowledge with pleasure the services rendered by so many, whether non-official or official, in helping the growth of the co-operative movement, and in this tribute they would include the humble individual who contributes his mite in the shape of honest work in a quiet way in some rural spot no less than those who are fortunate enough to work in more conspicuous positions. The thanks of Government are due to Rai J. M. Mitra Bahadur for the way in which he discharged his duties.

By order of the Government of Bengal,
(Ministry of Agriculture),

R. N. REID,
Secretary to the Government of Bengal.

In Calcutta and the suburbs, during the cold season, when the atmospheric conditions trap the smoke near the ground level, when curtains and clothes are blackened in a few hours, and the nostrils and the respiratory tract are clogged with soot, the death-rate from diseases of the breathing organs rises from 80 to 240 a week.

The smoke nuisance is ancient. Over 600 years ago Great Britain set up the first smoke Commission, formed of nobles. It appears that the smoke makers were executed, tortured and imprisoned in unavailing efforts to lay the smoke and sulphur. Through the centuries the smoke, soot and poisonous gases took their stealthy and heavy toll of human life. There seemed to be no commercial solution. Throughout the world, about two decades ago, economic conditions compelled a close study of fuel problems. Combustion engineering provided the service, furnaces and appliances were altered, more economic and different methods of using fuel were introduced. The scientific use of fuel solved economically, at least, the problem of industrial smoke abatement. But domestic smoke, which is responsible for about 75 per cent. of the damage, is not yet commercially solved. Under present economic conditions, the effect of cheap and smokeless power and heat is profound and is closely related to the health and prosperity of a nation.

General Control by the Commission.

The Commission held 13 meetings. The object of its endeavours is to give ever-improving service to the public and the mill owners. It spent much time and thought in keeping abreast of the latest trend in the scientific use of fuel and the latest achievements in industrial and domestic smoke abatement. The members visited installations for practical experience. A system of issuing bulletins on points of public interest was started. Sub-Committees were appointed to deal with larger questions, confer with the interests concerned and generally project the future programme.

The Commission felt incompetent to deal with the public health aspect and to meet this the Director of Public Health, Bengal, was appointed a member of the Commission. Medical authorities state that in large congested towns the death-rate from breathing organ diseases is a fair working index of the degree of atmospheric pollution by smoke. Investigations, from this angle, have been started. In the meantime the general diagram of deaths from respiratory diseases in Calcutta and the suburbs is appended, which shows that as the pollution of the air increases the death-rate rises.

The average emission from each factory and steamer chimney last year was the equivalent of .98 minutes of dense black smoke per hour. This year it has been reduced to .68 minutes, which is by far the lowest recorded. Index figures never appeal much less convince. But this shows the total black smoke daily emitted has been reduced by 3,500 minutes. In 1906, when the Commission assumed control the daily emission of black smoke was 200,000 minutes. It is now less than 12,000 minutes.

New Methods Reduce Smoke.

Well designed plants are necessary for smoke prevention and fuel economy, but these fail unless correctly operated. It appears to be the general experience of Smoke Departments in dealing with the "human element," the most important and elusive factor in smoke abatement, that engineers and firemen will not reduce smoke unless they know they are constantly watched, that every offence is detected and quickly followed up. Obviously the undetected offences should be as low as possible.

It is astonishing how inefficiencies collect around traditional methods. In June last, the Commission broke from tradition and reorganised the system of smoke observing, to give better service. The detected offences, which are reported to the owners for their departmental action, immediately jumped from 320 to 800 a month. To deal with this increase, the old "follow up" system was then modernised, effecting a remarkable smoke reduction.

Last year, 4,170 offences were reported. This year they rose to 7,433. And in addition to this 896 telephonic communications were sent to owners at the time of the commission of the offence, from the Central Smoke Observatory. During the year the inspections and tests for educational purposes rose from 5,023 to 5,976. Statutory Warnings were issued in 3 cases as against 22 for last year. There have been no prosecutions during the last two years. It appears to be the general experience in dealing with the skilled work of efficient smoke prevention that a broad educational and co-operative policy gives better results than prosecuting owners for failing to do that which they do not know how to attempt.

Complaints from the Public.

The public increasingly apply for relief to the Commission. During the year 63 complaints were received against 48 for the previous year. In a few cases the complaints were petty, but relief was given wherever possible. An analysis of the complaints gives a fairly accurate idea of prevailing conditions. Half the complaints are against domestic and kindred fireplaces using country soft coke as fuel. It is estimated that about 80 per cent. of such fireplaces use this coke, which is usually made at the collieries by burning raw coal in large open heaps and driving the smoke and valuable gases into the atmosphere. It takes about 1½ tons of raw coal to make one ton of coke. This coke may be fairly smokeless when used in high draft boiler furnaces. But it is not so when used in the low draft domestic and kindred fireplaces, as is evidenced, any evening, when the panwalla or durwan places his small furnace using coke outside the door and the smoke travels near the ground and blots out the street. If this is increased a quarter of a million times it gives an idea of the lowlying smoke in Calcutta.

Advantages of Approved Furnace Plans.

Under modern Smoke Ordinances the plans of installations of furnaces, etc., must be approved by the Smoke Department. This is to secure that the design is such that with reasonable efforts on the part of the operators the smoke from the furnaces can be efficiently maintained within the prescribed limits, and prevents the erection of furnaces from which it is impossible to abate smoke, and the consequent frequent prosecution of the owners.

During the year the Commission examined and approved 69 plans, of which 64, covering nearly all types of industrial furnaces for this and other provinces, were made in the office of the Commission. The Commission's wide experience was always at the disposal of the owners.

Local Examples of Fuel Economy.

About six years ago, the Commission by providing separators to prevent the discharge of light grit from the chimneys and improving the furnaces, gave a great stimulus to the use of rice husk instead of coal as fuel. This annually saved about 250,000 tons of coal for the province. Things then seemed good. But, lately, the local rice mills have experienced bad trading conditions. The mills have had to be frequently closed down, and with the waste of fuel in frequently raising steam they ran short of paddy husk. This had to be remedied. The first stage was to put in boiler feed heaters. Excellent feed heaters can be obtained at a price that the depressed trade cannot afford. Locally made heaters at a fraction of the cost and giving reasonable results were fitted. The next stage was to endeavour to boil the paddy with the exhaust steam from the engine instead of live steam direct from the boilers. This is now successfully working in one mill. The combination saves over 40 per cent. in fuel.

In another case, where the public complained against the rubbish from a local Match Factory being burned in open heaps, plans have been issued of furnaces to burn this rubbish and provide the power and heat required by the factory. This is the second of its kind the first has been in successful operation for some time.

In a Jute Press, the owners' well-directed endeavours for fuel economy, which were first set going over the original smoke trouble, have nearly halved the coal bill. The coal per bale of jute is now 9.2 lbs. against 17 lbs. in the old days. They hope to lower the cost further. The smoke trouble has been abolished.

Local Mill Ranks in the World's Best.

Much interest is centered in a 6 Lancashire boiler installation, at a jute mill, designed to burn cheap slack coal, nearing completion which should rank amongst the most economical of its kind in the world, and is also a high achievement in the scientific handling of India's fuel problems. The boilers are designedly 6 feet shorter than the standard length so as to give a very high steam super heat and to deliver the gases at about 800°F., to the main flues. A water economiser then reduces the temperature of the gases to about 600° F. after which an air heater further reduces them to a temperature less than 300° F., before entering the chimney. The air heater in turn raises the temperature of the air for the combustion of the coal to about 400° F. The boiler feed water is raised by exhaust steam to a temperature of 200° F.; before it enters the economiser. The steam for process work is bled from the main turbines. A very complete equipment of recording, measuring and testing instruments is provided.

Abating Smoke from Cheap Slack Coal Leads to Fuel Economy.

The extended use of the cheaper grades of highly bituminous slack coal has greatly complicated the local smoke problem. To efficiently abate smoke when using such coal in Lancashire boilers having restricted furnace volumes, particularly with hand firing, is a difficult problem. The solution is to supply regulated air above the fires. Seems easy. The highest fuel economy is secured when the air supplied for burning the fuel is as near the theoretical quantity as possible. A machine is attached to the boiler flues, when it indicates about 14 per cent. of CO₂ it shows that the air being supplied is as near the theoretical as it is safe to go. Further, the air must be properly mixed with the gases which is very difficult. In practice, separate layers of rich gas and of air travel side by side in the furnace and apparently never combine. This stratification or escape of unburned gases is a dead loss, to prevent which inventors have produced turbulent furnaces and burners.

Provided the draft is sufficient, in the usual Lancashire boilers it is comparatively easy to run smokelessly with 8 or 9 per cent. of CO_2 but the economy is low. If to raise the efficiency, the supply of air is reduced black smoke will be emitted which cannot be efficiently abated unless the system for distributing air above the fires and mixing the gases is sufficient.

The problem was to produce an arrangement that with reasonable efforts on the part of the firemen would produce the least smoke and the highest CO_2 . In this respect some of the engineers in the controlled territory have done pioneering work, improved the design of furnaces etc., to enable it to do that what it could not do as originally produced by the manufacturers. Distributing the air at the rear end of the furnaces was tried. Air at the front end gave better results. The best results appear to have been attained by an arrangement in a plant, distributing air at both front and rear ends and also on the sides of the furnaces. The plant is comparatively smokeless and is far below the prescribed smoke limits of the Act. The CO_2 is 13 to 14 per cent. It marks a high stage in the solution of this important subject. A sketch of the arrangement is appended.

Grit and Ash from Cheap Fuel.

A serious aspect of the smoke nuisance is the damage caused to public health by solids in the smoke. The recently extended use of cheap fuel throughout the world has produced its own grit problems. In burning pulverised coal some say the grit is so light that it floats from the chimney and is only brought down by rain. In a recent complaint regarding the grit from a pulverised fuel, Super Power Station, a complainant produced a bucket of grit, alleged to be daily collected from a small adjacent verandah.

A small station daily using 300 tons of pulverised coal with 20 per cent. of ash will annually discharge from the chimney about 17,000 tons of grit. These problems, in all probability, will soon be in Calcutta. Every scientific Smoke Department is awaiting the introduction of a cheap and efficient grit catcher.

Many of the mills, in the local controlled territory, are now using cheap fuel with artificial draft, which accentuates the grit problem. As this practice is rapidly extending, it is for serious consideration when artificial draft is installed whether grit catchers should be fitted.

The Calcutta Electric Supply Corporation, who recently fitted the latest type of grit catchers at their South Power Station, gives the following report on a week's run on slack coal:—

"Total coal burned during the period	.. 811 tons
Total boiler steaming hours during the period	.. 280 hours.
Grit collected during the period	.. 4 tons 11 cwt

There were only two 50,000 lbs. boilers steaming at any time and the boilers were not steaming at their full capacity."

This represents about 240 tons of grit a year, and if similar grit catchers had been fitted to the Company's Central Station the total annual collection of grit from both would be about 1,000 tons per annum.

Four similar grit arresters are being fitted at Tallah Pumping Station owned by the Calcutta Corporation.

The Commission have sent an expression of appreciation to the Calcutta Electric Supply Corporation on the excellent results of the grit catchers and also on the general reduction in smoke from their Central Power Station following the appointment of their own Smoke Observers and the installation of an electric system of smoke indicators.

Saving Fuel in an Oil-Burning Steamer.

In using oil fuel, where the fuel and air factors are so comparatively steady and easy of regulation, some say, they can tell from the colour of the flame whether the correct fuel, air ratio for the highest fuel economy is maintained. Unfortunately, no ordinary human being can do this. It requires a machine for analysing the gases. It pays for itself. The Chief Engineer of an oil-burning steamer who is keen on fuel economy and combustion engineering procured, at his own expense, an Orsat Gas Sampling Set. During the next sea trip most of his time was spent in the boiler room. On his return with a 10 per cent. reduction in the fuel bill, the owners returned the cost of the machine with a bonus. Machines were then fitted throughout the fleet and the maintenance of proper records insisted on.

Calcutta Lives among the Chimney Tops.

DOMESTIC AND KINDRED LOWLYING SMOKE IN CALCUTTA.

Schemes for the removal of the domestic smoke nuisances have been discussed from every angle throughout the world. In European cities the smoke is discharged at an altitude of 50 or 100 feet or higher depending on the height of the buildings. There, the community does not live in and breathe the poisonous atmosphere around the chimney tops. If it had, probably the domestic smoke nuisance would have been solved many years ago.

Calcutta lives among the chimney tops. Calcutta's quarter of a million fireplaces, tens of thousands of tea shops, eating houses, sweetmeat shops have no chimneys. The smoke and poisonous gases are discharged at ground level. When the atmospheric conditions trap the smoke near the ground and the wind fails, the atmosphere becomes saturated with smoke and poisonous fumes and the street lights cannot be seen from a few yards distance.

Wind and Rain Scavenge the Atmosphere.

Wind is the natural scavenger of the atmosphere. We can realise this by the way a fog disappears on the appearance of moderate wind. A wind with a velocity of 11 or 12 miles an hour will keep a town moderately clear of smoke. When it drops to 2 to 3 miles an hour the scavenging fails, the air thickens with impurities and the death-rate from breathing organ diseases rises, and the resistance to other diseases is reduced. Another natural scavenger is the rainfall, evidenced by the clearer atmosphere and the greater distance we can see after rainfall.

Recently, a Jute Mill installed a Smoke Washing System. An arrangement of pipes, in the main flue of the boilers, discharges water as fine spray into the smoke. This mill daily burns 35 tons of coal and the washing arrangement prevents the daily discharge of about 5 cwt. of impurities into the atmosphere. Nature on a grand scale during the rains of the monsoon washes the pollution from the atmosphere and the death rate falls.

Death-Rate from Polluted Atmosphere.

A diagram is appended showing the weekly death-rate from respiratory diseases in Calcutta and the suburbs for 1927, as modified by the natural scavengers—wind and rain. On referring to the diagram it appears that in the first week of January, 1927, with a wind velocity of nearly 2 miles per hour, the death-rate is 186. The wind then falls and the death-rate rises. About the middle of March the wind velocity rises and the death-rate falls. About June the rains of the monsoon start, which wash the pollution from the atmosphere. The death-rate gradually drops to 77 a week in October, when the rains stop. The wind velocity drops to about 1 mile an hour and the death-rate rapidly rises, ending with 244 deaths a week in January, 1928.

Under the special conditions of Calcutta the only radical remedy appears to be the extended use of smokeless gas appliances which can only come about by the supply of cheap gas. The endeavours of the Commission to reduce the price of gas is reviewed in its appropriate section.

Manufacture of Coke in open Heaps.

Some estimate that, in the controlled territory, about 100,000 tons of raw coal are burned in open heaps and made into coke. Accurate estimates are difficult, but, probably, 50,000 tons are nearer the actuals. This annually discharges about 3,000 tons of soot and solids and 1,600 tons of sulphuric acid at ground level. The general belief is that most of the coal is stolen and the coke sold. Kidderpore and Shalimar are the worst districts. Kidderpore where nobody lives unless compelled is ruined for residential purposes and there household linen becomes black in one day, and there the deaths from respiratory diseases are 19 per thousand compared with 3 for a clean district.

Under the Smoke Act the owner of the ground must prevent the making of such coke upon his ground. Some years ago the Commission took the matter up. The Police instituted 100 prosecutions. But under the difficulties experienced the matter had to be temporarily dropped. Recently, the Commission appointed a Sub-Committee to confer with the interests concerned and endeavour to devise effective methods for handling the question. In the meantime the Howrah Court has issued orders prohibiting the manufacture of such coke in Shalimar, and the Commission is operating in conjunction with the East Indian Railway authorities on a 4,000 ton district in Howrah. The Railway authorities have instituted several prosecutions.

Low Temperature Carbonisation.

Driven by economic necessity to the better utilisation of fuel, strenuous efforts are being directed to produce, by low temperature carbonisation, smokeless fuel, oil and gas from raw coal. When a smokeless fuel is produced that can be thrown anyhow into a furnace without producing smoke, it will remove the "human element," the last barrier to the realisation of the smokeless city. It will take some time to come about. When it does we should have very cheap gas.

Reduction of Smoke Nuisances by Electric Appliances.

Electric appliances both for commercial and domestic use should be encouraged as permanent remedies for atmospheric pollution caused by smoke. During the year 627 motors equivalent to 4,383 horse power were connected to the system of the Calcutta Electric Supply Corporation, Ltd. There are now approximately 6,059 motors, equivalent to 56,373 horse power, connected to the system.

Increase in the Use of Gas Appliances.

The extension of the use of gas appears to be the remedy for the deadly lowlying domestic and kindred smoke. The Oriental Gas Co., Ltd., report that the demand for gas-heated appliances continues to be very satisfactory and during the year 1,266 gas appliances, comprising 412 geysers and other water heating appliances, 497 gas cookers, 234 boiling rings and 123 miscellaneous appliances for domestic and industrial purposes, were connected to the mains of the Company.

Cheaper Gas for Calcutta.

Under the special conditions prevailing in Calcutta, cheap gas is a necessity. The Commission appointed a Sub-Committee to enquire why the price is so high that it prevents the reasonable extension of the use of gas. From discussion with the Gas Company it appears that, according to contract, the gas supplied to the Corporation is to the illumination or candle power standard, so all the gas in Calcutta must be made to this standard. Since the introduction of gas mantles it is heating gas that is required. Illuminative gas is unnecessarily expensive and is practically obsolete. Heating gas is cheaper and more efficient for modern requirements. Nearly all the towns of any consequence throughout the world use heating or calorific gas. Calcutta is amongst the last to use the old fashioned gas. Bombay changed over sometime ago.

A test was made at the Gas Works of the two gases. Two rows of gas lamps were fitted with representative burners, in common use, each opposite pair having the same type of burner. One row used the old and the other the new gas. The test was witnessed by the Sub-Committee and representatives from the Calcutta Corporation and the Gas Company. There appeared to be no difference in the lighting effects between the two gases.

Last August, the Sub-Committee and the representatives of the Calcutta Corporation and the Gas Company met in conference. The Gas Company offered to reduce Calcutta's annual gas bill by Rs. 1,26,000—the Corporation getting Rs. 28,000 and the public Rs. 98,000—with effect from the 1st January, 1928, provided the Calcutta Corporation would agree to change over to the calorific standard. This was unanimously accepted. The case was then passed on to the Calcutta Corporation for consideration.

Latest Methods of Producing Cheap Gas.

Strenuous efforts are being made, throughout the world, to reduce the price of town gas so as to extend its use. Gas Engineers are increasingly collecting the gas from the making of coke in industrial gas ovens, sometimes from considerable distances, and mixing it with town gas to reduce the price.

In last September's "Fuel Economist" a reference is made to a project in Europe to collect the gas from coke ovens and distribute it to towns over a radius of 300 miles. In the local coal-fields, which are only about 180 miles from Calcutta, enough gas is wasted, in the making of coke, to supply many Calcuttas.

Obituary.

The Commission records its deep regret at the tragic death, on the 11th April, 1927, of Mr. James Robson, a brilliant young officer, whose pleasant personality, integrity and wide experience were a valuable asset to the Department.

Conclusion.

The Commission records its grateful thanks, to the Sub-Committees for their valuable service, to the owners for their valued co-operation and suggestions, to those engineers whose high achievements in combustion engineering and whose examples have been of great service in spreading the methods of better utilisation of fuel and the reduction of smoke, and to the staff for its ability and loyalty.
